Employee Name:	
Date of Hire:	**Position Start Date:**
Job Classification: Technical Support	**Direct Supervisor: Sr. Manager Quality Assurance**

Job Description:

The QA Training Intern is responsible for assisting in the administration and maintenance of the Electronic Training System (ETS). In addition, the Intern will support the QA Department and gain knowledge of the FDA regulated industry.

Responsibilities:

- Perform Review of Training courses associated with new and revised documents
  - Ensure the course configuration is correct
  - Ensure correct assignment of the course(s)
  - If applicable, ensure exams are updated to match the revised document
- Assist in updating job profiles, job codes, and curricula
- Assist with new employee orientation
  - Create new employee training paperwork as needed
  - Train new employees on cGMP, Documentation Standards, and Manufacturing Process overview
- Process miscellaneous training activity
  - Employee movement (i.e. separation or job transfer)
  - Daily training requests: Assign/remove job codes, file miscellaneous training, launching requested re-training, etc.
- Support Training Department as needed
- Execute and report analysis within the ETS database as requested by Quality Management
- Follow Standard Operating Procedures, safety, health, and cGMP Guidelines

Qualifications:

- Progressing to bachelor degree in a Science, Technology, Engineering, or Mathematical field or BA or BS degree
- Proficient with current word processing and database software
- Strong interpersonal/group skills
- Strong communication skills, verbal and written

I understand and accept the responsibilities as described above.

CAPGEMINI – COLUMBIA, SC

TECHNICAL SALES INTERNSHIP

Job Description: The sales enablement role focuses on representing Capgemini to the market and our internal sales and account organizations. This person will develop and manage messaging content and tools to better enable the sales team to sell more effectively and will ensure that our clients, the analyst community, and broader market understand the value that Capgemini can offer. This role is focused on providing our sales and account teams with what they need to successfully engage the buyer throughout the buying process to better qualify the opportunity.

Requirements:

- Excellent communications skills including presenting editing and writing as well as accuracy and attention to detail required
- A fast-thinking high energy individual with a sense of humor and ability to work with a wide range of personalities will thrive in this role
- Excellent cross group collaboration skills
- Ability to influence actions from a varied group of resources especially from those who do not have a reporting relationship to you and may be senior in the organization to you
- Strong workability in Microsoft Office suite
- Pursuing a degree in marketing, business, any operational engineer type degree (or management engineering).

Responsibilities:

- Create and maintain compelling sales presentations to ensure consistent messaging to the market and clients.
- Respond to analyst RFIs to present Capgemini Insurance BU strengths to maintain or improve overall rating in various analyst reports.
- Coordinate the resourcing of strategic deals and ensure large deal best practices are consistently executed in our strategic pursuits
- Build best practices and initiatives to better enable our account and sales teams

Please send resume and cover letter for review.
