

Hans Addleman

- Hans Addleman is the Principal Network Systems Engineer at at Indiana University International Networks since 2015. His support of international projects includes Manhattan Landing (MAN LAN), Washington International Exchange (WIX), TransPAC, and the Internet2 Singapore Exchange. Addleman started at Indiana University in the UITS Support Center in 2001 and advanced into a position in the IU Network Operations Center soon after. In 2003, he took a position as Network Engineer with IU Campus Networks, working in the Layer3 Engineering group. By 2006, Addleman had joined the IU GlobalNOC and built his networking experience in several roles -- including network planning and deployment, as well as Internet2 AL2S OpenFlow-based network and technical training.
