Overview Network Tools and Protocols Lab Series

NTP Lab Series

The lab series provides learners an emulated WAN infrastructure operating at high speeds, up to 50 Gbps, and devices running real protocol stacks

It helps students to acquire hands-on skills on

- Performance and measurement tools
- Configuration of devices for high-speed networks
- Emulate scenarios using real protocol stacks

NTP Lab Series

The lab series can be partitioned into three parts

- Measurement (throughput, latency, packet loss) and emulation (link bandwidth, buffer size, delay) tools
- TCP features for high speed transfers, router buffer size
- Active Queue Management (AQM) algorithms

Organization of Lab Manuals

Each lab starts with a section *Overview*

- Objectives
- Lab settings: passwords, device names
- Roadmap: organization of the lab

Section 1

- Background information of the topic being covered (e.g., fundamentals of TCP congestion control)
- Section 1 is optional (i.e., the reader can skip this section and move to lab directions)

Section 2... n

- Step-by-step directions
